

Q1 2026 Operations & Support Incident Summary

- **January 2026:** We noticed a critical 45% spike in customer support tickets originating exclusively from the North region. Customers reported severe API latency issues.
- **February 2026:** The latency issue was resolved. However, account management notes show that our high-priority account, TechCorp Solutions, expressed deep dissatisfaction during this period and threatened to delay their upcoming contract expansions.
- **March 2026:** Operations stabilized globally. Mid-Market accounts in the North region reported smooth onboarding.
